- ✓ MongoDB
- ✓ AWS(RDS,EC2,Lightsail)

TOOLS

- ✓ Eclipse
- ✓ Diagram plus
- ✓ VS code
- ✓ Termius
- ✓ Postman
- ✓ Tableplus
- ✓ GitHub & GitLub
- ✓ Beekeeper studio

PROJECTS

Fitness Tracker

- I designed and developed a Fitness Tracker web application using React for the frontend, Node.js for the backend, and PostgreSQL for data storage. This application efficiently manages food and workout schedules, providing user-friendly features such as schedule tracking and personalized fitness plans to enhance the overall health management experience.
- link of the website - https://youtu.be/IAH_lwtWatw

Bookmark Pages app

- I have worked in Bookmark Pages app with secure phone number authentication, allowing users to save HTTP links with tags, titles, and descriptions. Implemented duplicate link prevention. User-friendly features include updating info, filtering, and searching by tags, titles, and descriptions
